

Bulk Gases

Benefits:

- Higher Purity
- Automatic Reordering
- Convenience
- Increased Safety

Expertise

TWSCO has the equipment and the expertise to meet your bulk gas needs. Our experienced team of experts can help you manage your gas requirements from evaluating your present setup, designing a bulk system, to installing and maintaining a system suitable for your needs.

equipment options for our customers including palletized manifolded packs, smaller MicroBulk vessels, 600 - 6,000 gallon vessels, and a variety of accessories including mixers for blended gas options.

Establishing a bulk gas system can eliminate the clutter of packs, VGL's and cylinders in your facility. This provides a safer working environment for employees, solves consistency and quality issues, all of which improve weld quality and provide cost savings through the enhanced utilization of resources and equipment and by reducing labor costs.

Service

TWSCO is a locally owned and operated family business and services the greater Houston and surrounding areas. By offering customer service that is second to none, TWSCO continues to establish long-term partnerships with our customers.

Available Gases and Equipment

Gases available for bulk storage at the customer's location in bulk form are argon, nitrogen, oxygen, carbon dioxide, propane and propylene. Some gas mixes are also available in bulk liquid form.

TWSCO makes available a wide variety of quality
