

# Mini-Mite

## Benefits:

- Does not require an engineered pad.
- Can be filled by MicroBulk Truck, Bulk Tanker, or both.
- Can be moved (empty) by a medium sized fork truck.
- Several vaporizer and final line regulator options.
- Utilized 500 - 600 gallon remanufactured bulk tank.

## Cyl-Tel

The new Cyl-Tel System is a liquid gauge and Telemetry system designed exclusively for MicroBulk distribution. It provides remote liquid-level monitoring of cylinders equipped with differential pressure gauge (DPG) connections.

The Cyl-Tel gauge is an electronic DPG which features two programmable low-level alerts. The gauge is designed for rugged applications and is enclosed in a water-resistant case suitable for outdoors. Up to three Cyl-Tel gauges may be connected depending on the desired configuration.

The Cyl-Tel gauge is programmable to display seven different units of measurement for user friendly and accurate level monitoring. With its Telemetry ready capability, the Cyl-Tel gauge allows the gas supplier to monitor the liquid level in your Perma-Cyl and refill it automatically.
